Skills

- JavaScript | TypeScript | React | Node.js | Express.js | MongoDb
- Firebase | HTML | CSS | GraphQl | Apollo | Next.js | Unit Testing

Experience

Frontend Developer	Microsoft via Allyis	10/2022 - current

- Contributed to the development of Microsoft Teams 2.1 application applying software development best practices using **TypeScript, React, GraphQl, Apollo, Jest and React-testing-library**.

- Working for Microsoft has given me the chance to work with cutting-edge technology and to collaborate with some of the brightest minds in the industry. My role allows me to make a positive impact on the lives of millions of people worldwide, which is truly rewarding.

- Collaboration is key on this role, as I work closely with other developers, designers, and product managers to ensure that the app is meeting the needs of users and staying ahead of the competition.

Frontend Developer	Veelancing	02/2022 - 10/2022

- Worked on a revolutionary project that is meant to change the world of freelancing with the innovative way to handle transactions between costumer and freelancer via smart contracts, using **JavaScript, React, Redux, Redux-Saga, CSS and Material UI**.

- Contributed to the migration of the Veelancing app to meet the Microsoft requirements in order to be added to Microsoft Teams marketplace.

- Contributed simultaneously on projects for costumers like Netopia and BCR, to meet they're needs and requirements, providing them with high quality software.

Personal projects   (05/2021 - 02/2022)

Chat Application -- TypeScript - React - Express.js - MongoDb - Socket.io

E-commerce application -- JavaScript - Next.js - Firebase

Instagram clone -- JavaScript - React - Firebase

Covid-tracker app -- JavaScript - React

Movieflix -- JavaScript - React
