ALEXANDRU-MIHAI FLICTER
Frontend Developer

WORK EXPERIENCE

VBR Labs -- February 2022 - present

InnovX-BCR

 - Managed the development of responsive, cross-borwser compatible app;
 - Implemented Formik in order to dispaly and handle errors both from frontend and backend;
 - Handled big datasets and display them to the frontend in form of charts.

Veelancing

- Made the app fully responsive and cross-browser compatible;
- Made the web app load faster and handled errors coming from backend, for a better user experience;
- Built a filter menu for a easier find of freelancers or jobs.

PERSONAL PROJECTS

E-commerce website / Next.js · Firebase · MaterialUI
January 2022 - February 2022

- Developed the interface with Next.js, added all functionality an e-commerce website is notorious for,
like: filter through products and keep track of user's cart;
- Implemented Firebase Auth in order to keep track of user's cart on any device, although, if the user is not logged in, local storage keeps track of user's cart.
- Used Firebase Firestore so the owner is able to add more products on the website.

Instagram Clone / React · Firebase · MaterialUI
November 2021 - December 2021

- Developed a 1 on 1 copy after the notorious social media application;
- Incorporated Firebase Auth to handle user-authentication, Firestore to keep track of user's posts and Firebase Cloud to store the user photos;
- Implemented Material UI Skeleton for a better user
experience, as the user will be aware that the website did not freeze, as long as the data is fetched from db;

Covid-19 Tracker / React · Chart.js · Covid-19 API
October 2021 - November 2021

 - Displayed data provided by Covid-19 API using React;
 - Designed line chart to display daily and historical data using Chart.js;
 - Designed table to display all time data using React Table;

Movieflix / React · TMDb API · React Router Dom
September 2021 - October 2021

- Developed a responsive movie search app, inspired by the well known Netflix app;
- Implemented React Router Dom to maintain the simplicity of a single page application;
- Implemented a live search option which let's user find favorite movies;
